

# ADVISING BOOKLET

---

FALL 2019

GEORGE R. BROWN  
**SCHOOL OF ENGINEERING**

# UNDERGRADUATE ADVISING

---

FALL 2019

This advising booklet provides only the first step toward the design of your Rice education. Your divisional advisor is a crucial ally who will help tailor a plan of study that best fits your inclinations and aspirations.

Student-faculty interaction is a trademark of Rice education. Consult regularly with your divisional advisor, one of the many faculty members waiting to work with you in the coming years.

# CONTENTS

<b>2</b>	Introduction to School of Engineering
<b>4</b>	Description of Majors
<b>8</b>	Description of Minors
<b>12</b>	Bioengineering
<b>16</b>	Chemical and Biomolecular Engineering
<b>22</b>	Civil and Environmental Engineering
<b>30</b>	Computational and Applied Mathematics
<b>34</b>	Computer Science
<b>40</b>	Electrical and Computer Engineering
<b>46</b>	Materials Science and NanoEngineering
<b>52</b>	Mechanical Engineering
<b>58</b>	Statistics
<b>62</b>	Major Advisors
<b>63</b>	Divisional Advisors
<b>64</b>	Requirements for Bachelor's Degrees
<b>65</b>	Engineering Courses Accessible to Freshmen

*This booklet is intended to give you, as a freshman engineering student, an overview of the undergraduate degree programs in the School of Engineering. It includes some general advice and contact information along with degree summaries and sample degree plans for each engineering degree.*

*The degree summaries and sample plans will help you compare majors and provide a starting point for mapping out your own course schedule. The booklet is intended as a supplement to, not a replacement for, other department advising materials. Although we have worked hard to make this booklet as accurate as possible, the information in the General Announcements is the final authority on degree requirements and academic regulations at Rice.*

## **Two Kinds of Faculty Academic Advising**

Every incoming engineering student is assigned an engineering divisional advisor—a faculty member from the School of Engineering who is associated with a student's residential college and who provides academic advising to those considering engineering majors. You should consult with your divisional advisor prior to registering for classes each semester. You may also consult with major advisors before declaring a major. See page 60 for a complete list of advisors.

When you declare your major, the department will assign you to an academic advisor within the department. Your departmental advisor will help you decide what courses you will take to satisfy your degree requirements and when you should take them.

The School of Engineering strongly encourages students planning engineering majors to declare their majors in the spring semester of their freshman year before registering for the sophomore year. Declaring a major in the freshman year should not discourage you from continuing to discuss degree plans with as many advisors as you wish (divisional or departmental, inside or outside of Engineering). Many students are looking at more than one field in their freshman year. However, if you wait until the end of the sophomore year to choose a major, it may be difficult to complete a degree in four years.

## **Advanced Placement Credit and the Sample Degree Plans**

Many entering freshmen come to Rice with substantial advanced placement course credit, particularly in math, physics and chemistry. Talk with your divisional advisor and the instructors in the relevant courses if necessary, to determine whether your background has prepared you for more advanced courses at Rice. The sample degree plans in this booklet assume that you have no AP or transfer credit. Each sample is also only one of many possible schedules. Talk with your divisional advisor and a department academic advisor if necessary, to begin developing a degree plan that fits your situation and goals.

---

## Freshman Writing Intensive Seminars

Unlike all other courses at Rice, you are assigned a specific semester in which to take a freshman writing intensive seminar (FWIS). Therefore, if you plan to pursue an engineering major, you need to carefully consider these courses during registration to make sure that you are able to get into a section that does not have a time conflict with courses that are required for your major.

In all of the sample schedules throughout this book, the FWIS course is listed in the fall of the freshman year and there is at least one distribution course listed in the spring of the freshman year. If you are assigned to take an FWIS in the spring, you should swap the semesters of the FWIS and a distribution course in the freshman year. Students interested in an engineering-centric FWIS should consider FWIS 188. For further information about the FWIS requirements, please visit <http://pwc.rice.edu/>.

## Selecting an Engineering Major

The Introduction to Engineering Course (ENGI 101) is a 1 credit course designed to help you learn about the types of problems engineers solve in different disciplines and the tools they use to do it. Throughout the course, faculty members from the different engineering programs offered at Rice will talk about their major and describe the career paths available in their fields.

In addition to registering for this course we encourage you to attend research seminars, join student clubs, and talk to your divisional advisor and faculty in the departments that you are interested in. Spend your first year at Rice learning more about the options available to you, and you will be ready to make this decision.

## Selecting Courses in the Major

You will see on many of the degree summaries that you often have choices for courses. For example, a degree may require physics, but allow you to choose either PHYS 101 or PHYS 111. Several of the sample plans or degree summaries note these choices so that you are aware of your options. Sometimes a department will specify a preferred course, sometimes not. Consult other department advising materials and/or talk to the department advisors for more information.

## International Engineering

Every department in the School of Engineering strongly encourages its students to incorporate international experiences into their education at Rice. Academic advisors in your department can help you determine appropriate course work for study. See [engineering.rice.edu/abroad](http://engineering.rice.edu/abroad) for more information on the best semester to study abroad depending on your major. Planning ahead of time is essential when you want to take advantage of this opportunity. Keep in mind that there are also summer opportunities available to study abroad. See [abroad.rice.edu](http://abroad.rice.edu) and visit the study abroad office to help you make arrangements.

There are many international experiences available to engineering students. The Oshman Engineering Design Kitchen (OEDK) offers iSEED as an international study abroad opportunity, to work on community- and client- based projects ([oedk.rice.edu/minor](http://oedk.rice.edu/minor)). Engineers Without Borders ([ewb.rice.edu](http://ewb.rice.edu)) and Rice 360 Institute for Global Health ([rice360.rice.edu](http://rice360.rice.edu)) offer international opportunities to tackle real-world design challenges in the developing world. There are also study abroad programs and internship programs through CLIC (<https://clic.rice.edu/study-abroad>) and the study abroad office. Make sure you take advantage of these opportunities.

# DESCRIPTION OF MAJORS

---

## OFFERED BY DEPARTMENTS

### **Bioengineering**

The overall goal of the B.S. degree in Bioengineering (B.S.B) is to prepare graduates to succeed in professional careers by equipping them with the conceptual and technical expertise sought after by top graduate and medical schools, as well as companies seeking technical skills in bioengineering. Recognizing that graduates may embark on a number of different educational and career paths, the educational objectives that graduates are expected to exhibit or achieve with the B.S.B from Rice University are:

- 1.** Graduates demonstrate technical and/or professional skills, which may include engineering problem-solving, scientific inquiry, and/or engineering design, to solve challenging problems in bioengineering and related fields.
- 2.** Graduates are accomplished at communicating and working collaboratively in diverse work environments.
- 3.** Graduates seeking further education at graduate, medical or other professional schools find appropriate levels of success in admission to and progression through these programs. Graduates entering professional careers find appropriate career progression and success.

---

## Chemical and Biomolecular Engineering

Our department offers two undergraduate degrees: the Bachelor of Science in Chemical Engineering (B.S.Ch.E) and Bachelor of Arts (B.A.) degree. Only the program leading to the B.S. degree in Chemical Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, [www.abet.org](http://www.abet.org).

In today's rapidly changing business climate, industrial sectors from petrochemicals to biotechnology and semiconductor manufacturing offer a wide variety of employment opportunities to our graduates. As a result, chemical engineering graduates may get involved with (among others):

- the development of new processes and products for the chemical industry;
- exploration, production and refining of oil and natural gas;
- design and optimization of fabrication facilities for semiconductors or magnetic storage devices;
- production of advanced materials from plastics and fibers to catalysts and biomaterials;
- design of water and air pollution control devices;
- production of pharmaceuticals and biologic devices for medical applications.

Although industry employs the majority of chemical engineering students receiving a bachelor's degree, a large fraction of our graduates continue their education in graduate schools to prepare for academic or industrial R&D careers, and in medical, law or business schools.

## Civil and Environmental Engineering

The oldest of the recognized "disciplines" in engineering, civil and environmental engineering disciplines are very broad and address virtually any system or infrastructure related to earth, water, air, or civilization and their processes. At Rice, CEE offers a choice among four educational foci: environmental engineering, hydrology and water resources, structural engineering and mechanics, and urban infrastructure, reliability and management.

CEE prepares leaders to solve present and future technical and societal problems. We provide a rigorous, coherent curriculum from which students gain an understanding of the physical, mathematical, chemical and biological, as well as socio-economic systems and ethical frameworks that affect engineering research and practice. We emphasize design and the development of professional communication skills and strategies, especially those requiring collaboration and teamwork.

Students gain experience and knowledge from domestic and international experts in academia, research and industry. To prepare for the global workplace, service learning experiences are offered, typically during academic breaks. For example, undergraduate members of Rice's nationally recognized chapter of Engineers Without Borders, a student-run organization, work to bring sustainable technologies to developing regions of the world like Central and South America. The educational experience in CEE is fun and unique because of strong emphasis on student leadership, cross-disciplinary application and access to faculty, and our integration of undergraduate education with cutting-edge research.

## Computational and Applied Mathematics

Our graduates have enjoyed an excellent job market for decades and can expect to be hired in engineering consulting, government, regulatory agencies, industry and, with advanced degrees, academia.

In the CAAM undergraduate program, students learn to apply the advanced techniques needed to model and analyze complex physical systems. The curriculum provides a sound grounding in underlying mathematical theory, emphasizes a variety of useful mathematical techniques, and helps students develop proficiency in computational modeling and high performance computing. Graduates with degrees in computational and applied mathematics are in demand in industry, government and academia, where they often join with physical and biological scientists, engineers, and computer scientists to form teams. Such interdisciplinary teams represent the modern approach to dealing with complex problems whose solutions require mathematical and scientific skills.

## Computer Science

An education in computer science includes training in systems design, implementation (i.e., programming), mathematics, and the analysis of algorithms, systems and problems. A computer scientist must understand what can be computed, what can be computed quickly, and what can be built. The undergraduate computer science curriculum at Rice includes a core set of courses that teach skills common to all areas in computer science, as well as specialized courses that delve more deeply into specific areas such as artificial intelligence, bioinformatics, computer architecture, databases, graphics, networking, programming language design and implementation, physical algorithms, security and verification. We welcome students with little or no programming experience. Computer science requires the ability to think clearly and analytically; we can teach you the rest. With computing integrated into every facet of

modern life, a computer science degree can lead to many diverse careers. We develop tools that enable fields such as scientific simulation, financial market analysis, medical imaging and robotic exploration.

## Electrical and Computer Engineering

Electrical and computer engineering (ECE) is the creation, innovation and design of technologies in computing, communications, electronics and machine learning. ECE is at the crossroads of hardware and software—the integration of these tools to create better, faster, safer technologies for things like cars, aircraft, computers, smartphones and surgical robots. We invent and develop technologies and devices for the betterment of humanity.

ECE's flexible programs educate engineers and scientists to be leaders in academia, industry and government. ECE graduates go on to work in almost every field imaginable, including healthcare, energy, law, the space industry, entertainment and security. The opportunities are broad; the major has many avenues for interdisciplinary learning and collaboration.

Undergraduates are encouraged to participate in research by contacting ECE faculty directly or through the Vertically Integrated Projects (VIP) program. Summer internship opportunities are available in ECE labs and with our industrial affiliates. Additional experiential learning is available through study abroad experiences.

At Rice, ECE faculty rewire and study the brain to combat Parkinson's, epilepsy and PTSD. They build lensless cameras, explore oil reservoirs, and bring wireless technology to the underserved. They push the state-of-the-art in national security, healthcare, data science, photonics, neural engineering, communications and laser spectroscopy.

## **Materials Science and NanoEngineering**

Materials engineering is concerned with the processing, structure, properties and performance of materials used by society. These include metals and their alloys, semiconductors, ceramics, glasses, polymers, composites and nanomaterials. The materials engineer applies principles of math, physics and chemistry to design, produce, characterize and utilize the materials necessary for today's engineering. The curriculum in the Department of Materials Science and NanoEngineering provides students with the requisite skills and educational background to contribute to the solution of many materials and nanoeengineering problems, allow him or her to work in a fascinating field and make it possible for them to become a leaders in one of the most challenging technological areas.

## **Mechanical Engineering**

Mechanical engineering, one of the broadest and most versatile of the engineering professions, generally deals with the relations among forces, work or energy, and power in designing systems to improve the human environment. The products of their efforts may be automobiles or jet aircraft, nuclear power plants or air-conditioning systems, large industrial machinery or household can openers.

The mechanical engineering program is designed to prepare the graduate to assume positions of leadership, qualify for admittance to top level graduate programs, contribute to the advancement of knowledge, and to have a strong understanding of engineering professional and ethical responsibilities.

## **Statistics**

Statistics is concerned with the interrelationships between observation and theory. Thus statistics deals with the formulation and application of the scientific method. Important components of statistical studies include probability, mathematical statistics, model building, statistical computing, quality and process control, time series analysis, regression theory, nonparametric function estimation, experimental design, Bayesian analysis, stochastic processes, sampling theory, biostatistics, bioinformatics, genetics, epidemiology, computational finance, environmental metrics, defense analysis and simulation.

The department's goals are to acquaint students with the role played in the modern world by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in statistics. The undergraduate statistics program is flexible and may be oriented towards theoretical or applied training or towards joint work in a related department, such as biology, economics, education, electrical engineering, computational and applied mathematics, mathematics, political science or psychology.

Statisticians make important contributions in data science, business, finance, bio medicine, economics, engineering, sociology, defense and environmental science. The demand for statisticians at the bachelor's, master's and doctoral levels is one of the highest for any professional group.

# DESCRIPTION

---

## OF ENGINEERING-RELATED MINORS AND CERTIFICATES

### **Computational and Applied Mathematics**

The departmental minor in computational and applied mathematics develops a range of skills in mathematical modeling, analysis, and scientific computing that complements any major in science, engineering and economics.

#### **Summary requirements**

CAAM 210, (CAAM 334 or CAAM 335), (CAAM 336 or CAAM 378), three additional CAAM electives, two at or above the 400 level.

#### **For details, see**

<https://caam.rice.edu/caam-minor>

#### **Minor advisors**

Keith Cooper, [keith@rice.edu](mailto:keith@rice.edu)

Beatrice Riviere, [riviere@rice.edu](mailto:riviere@rice.edu)

Andrew Schaefer, [andrew.schaefer@rice.edu](mailto:andrew.schaefer@rice.edu)

### **Energy and Water Sustainability**

Sustainability encompasses an approach to design and decision-making that takes into account the economic, social and environmental implications of human activities. This interdisciplinary minor studies the design of safe, secure, sustainable energy and water resources.

#### **Summary requirements**

CEVE/ENGI 302, CEVE 307, (CEVE 301/ECON 480/ENST 480), three electives, and 1-credit design practicum.

#### **For details, see**

<https://ceve.rice.edu/sustainability-minor>

#### **Minor advisor**

Jim Blackburn, [jbb@blackbur.com](mailto:jbb@blackbur.com)

---

## Financial Computation and Modeling

The interdisciplinary minor in financial computation and modeling (FCAM) prepares students for quantitative positions in the financial industry. Students are prepared in advanced quantitative methodologies and the basics of financial markets.

### Summary of requirements

Students take three foundation courses in economics and statistics and three elective courses covering quantitative finance and markets.

### For details, see

<http://cofes.rice.edu/>

### Minor Advisor

Katherine Ensor, [ensor@rice.edu](mailto:ensor@rice.edu)

John Dobelman, [dobleman@rice.edu](mailto:dobleman@rice.edu)

Ted Loch-Temzelides, [edt@rice.edu](mailto:edt@rice.edu)

## Global Health Technologies

The minor in global health technologies (GLHT) offers a unique, multidisciplinary program to educate and train students to reach beyond traditional disciplinary and geographic boundaries to understand, address and solve global health disparities.

### Summary of requirements

GLHT 201(Bioengineering and World Health), followed by a series of core and elective courses in science/engineering and humanities/social science/policy, culminating in a capstone design course.

### For details, see

<http://www.rice360.rice.edu/glht-minor>

### Minor advisor

Yvette Mirabal, [ymirabal@rice.edu](mailto:ymirabal@rice.edu)

Meaghan Bond, [meaghan.mc.bond@rice](mailto:meaghan.mc.bond@rice)

Andrea Gobin, [agobin@rice.edu](mailto:agobin@rice.edu)

## Statistics

In the modern information age, the ability to understand and process data from a variety of sources is critical in every area of human inquiry. The minor in statistics is designed to complement a student's primary area of study. Two tracks are offered: Track A is designed for students with strong mathematical and computational interests; Track B develops a broad understanding of and appreciation for the correct use of statistical methodologies.

### Summary of requirements

Three specific courses and three elective courses from statistics at the 300 level or higher.

### For details, see

<http://statistics.rice.edu/statminor/>

### Minor advisor

Philip Ernst, [philip.ernst@rice.edu](mailto:philip.ernst@rice.edu)

## Mathematics

The departmental minor in mathematics develops specific analytical problem solving skills, as well as a logical perspective that is valuable in many science and engineering disciplines.

### Summary requirements

Typically MATH 211-212 or 221-222; courses in analysis, linear algebra, and discrete mathematics/algebra; and one additional class at the 300-level or higher.

### For details, see

[www.math.rice.edu/Academics/Undergraduate/MathMinor.html](http://www.math.rice.edu/Academics/Undergraduate/MathMinor.html)

### Minor advisors

Zhiyong Gao, [zgao@rice.edu](mailto:zgao@rice.edu)

Frank Jones, [fjones@rice.edu](mailto:fjones@rice.edu)

Stephen Semmes, [semmes@rice.edu](mailto:semmes@rice.edu)

Stephen Wang, [sswang@rice.edu](mailto:sswang@rice.edu)

## Data Science

The Data Science (DS) minor is interdisciplinary in nature, accessible to all undergraduate students across campus. The minor will develop critical thinking skills and practical capabilities by teaching students to:

- **formulate questions in a discipline that can be answered with data;**
- **use tools and algorithms from statistics, applied mathematics, and computer science for analyses;**
- **visualize, interpret, and explain results cogently, accurately, and persuasively;**
- **understand the underlying social, political, and ethical contexts that are inevitably tied to data-driven decision-making.**

### Summary requirements

Required courses include 3 foundational courses (MATH 101, MATH 102, COMP 140) and 6 core courses (DSCI 301, DSCI 302, DSCI 303, DSCI 304, DSCI 305, STAT435)

### For details, see

<http://datascience.rice.edu/data-science-minor>

### Minor advisors

Rudy Guerra, [rguerra@rice.edu](mailto:rguerra@rice.edu)

Chris Jermaine, [cmj4@rice.edu](mailto:cmj4@rice.edu)

Renata Ramos, [rfr1@rice.edu](mailto:rfr1@rice.edu)

Fred Oswald, [fred.oswald@rice.edu](mailto:fred.oswald@rice.edu)

Kristen Ostherr, [kostherr@rice.edu](mailto:kostherr@rice.edu)

## Engineering Design

The minor in engineering design prepares students to solve open-ended engineering challenges by giving them myriad opportunities to experience the steps in the design process. The EDES minor capitalizes on strengths in engineering design at Rice – both innovative and successful engineering design courses and unsurpassed facilities that are available for undergraduate engineering students starting in their freshman year. The expertise students gain will complement their academic major and provide a deep understanding and the skill set to successfully embark in engineering design careers.

### Summary requirements

Introduction to Engineering Design (ENGI 120/220 or FWIS 188), ENGI 200, ENGI 200, ENGI 210, and ENGI 350; two elective courses; participate in 2 different design projects.

### For details, see

<http://oedk.rice.edu/minor>

### Minor advisors

Maria Oden, [moden@rice.edu](mailto:moden@rice.edu)

Gary Woods, [gary.woods@rice.edu](mailto:gary.woods@rice.edu)

Joseph Cavallaro, [avallar@rice.edu](mailto:avallar@rice.edu)

Matthew Wettergreen, [mwettergreen@rice.edu](mailto:mwettergreen@rice.edu)

Deirdre Hunter, [hunterd@rice.edu](mailto:hunterd@rice.edu)

## Rice Center for Engineering Leadership Certificate

The difference between a “really smart” engineer and an engineering leader is the ability to communicate, create a guiding vision, build a high performing team, and develop and execute a shared plan. The RCEL Certificate in Engineering Leadership will set you apart from your peers and provide the skills necessary to succeed in your future career. Through a series of 100-400 level RCEL courses, you will discover your personal strengths, motivations, and aspirations as leaders, learn the principles of ethical engineering leadership, and practice the strategic application of advocacy and decision making skills in an engineering team environment, all while acquiring hands-on experience leading a team through engineering challenges. In addition, RCEL students pick specialized tracks based on career interests and learn key project management skills from PMP® certified instructors and industry professionals.

### **Summary requirements**

Required courses included RCEL 100, RCEL 200, RCEL 241, RCEL 300, RCEL 400, RCEL 450. An additional course must be selected from RCEL 410, RCEL 420, RCEL 430, RCEL 440 based on the specialized track selected.

### **For details, see**

<http://rcelconnect.org>

# BIOE

## Bioengineering

<b>WEB LINKS</b>	<a href="https://bioengineering.rice.edu/undergraduate-program/degrees-offered">https://bioengineering.rice.edu/undergraduate-program/degrees-offered</a> (general website)
<b>FRANK ADVICE</b>	Don't try to rush through this 4-year program. Prerequisites are very important for BIOE classes; since some courses are offered once a year, failure to get the correct prerequisites can put you behind an entire year. You must take ELEC 243 before BIOE 383/5, and MECH 202 before BIOE 372. Get involved in research.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Take BIOC 201 or a more advanced math (e.g., MATH 211) during your first year. Consider ENGI 120, ENGI 128 or FWIS 188.
<b>ALTERNATIVE CURRICULA</b>	If you are a pre-med student, consult with Health Professions Advising in the Office of Academic Advising. There are a few "extra" courses above the BIOE major that you must complete as a pre-med student.
<b>BS VERSUS BA</b>	BIOE only offers a B.S. degree. The B.S. in Bioengineering (B.S.B.) is accredited by the Engineering Accreditation Commission (EAC) of ABET, <a href="http://www.abet.org">www.abet.org</a> .
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	BIOE 202 Careers in Bioengineering; take this one-hour course in the spring of your freshman year. A series featuring guest lecturers will help you find out what bioengineering is all about.

<b>RESEARCH</b>	Over 70 percent of our students participate in research either at Rice or at an institution in the Texas Medical Center. When participating in research at Rice, students can either receive credit as BIOE 400 or BIOE 401, or they can be paid. Students conduct research during the school year as well as during the summer. Contact a faculty member directly if you are interested in working in his/her laboratory.
<b>INTERSHIPS</b>	Internships in industry and other universities are available for all levels of students. Rice BIOE also offers several summer research internship opportunities.
<b>STUDY ABROAD</b>	The best time to study abroad is during the spring semester of the junior year; a few students go during the spring of sophomore year. Typically, students complete technical coursework while abroad. Consult a BIOE advisor early if you are interested in study abroad opportunities.
<b>PROFESSIONAL ORGANIZATIONS</b>	The Biomedical Engineering Society (BMES) has a student chapter at Rice. They plan activities throughout the year that focus on professional development as well as social interactions between all levels of students and faculty. bmes.rice.edu
<b>INTERESTING COURSES FOR NON-MAJORS</b>	The Beyond Traditional Borders program offers a minor in global health technologies. Selected courses for non-majors include GLHT 201, GLHT 360, GLHT 392, GLHT 451, GLHT 452.

# B.S. In Bioengineering

**Specializations:** None available. Students select technical electives to suit their academic interests and career plans.

## Sample Degree Plan

THIS IS ONE EXAMPLE OF MANY POSSIBLE SCHEDULES.

CONSULT A DIVISIONAL OR DEPARTMENTAL ADVISOR TO CUSTOMIZE YOUR DEGREE PLAN.

FALL				SPRING			
<b>FRESHMAN</b>		17 credits		<b>FRESHMAN</b>		17 credits	
MATH 101	Single Variable Calculus I or 105	3		MATH 102	Single Variable Calculus II or 106	3

LPAP	Lifetime Physical Activity elective	1					

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

• When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.

•• When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

§ When registering for CHEM 211, you must also register for CHEM 213, the discussion section for 211.

‡ Students may choose to replace one and only one of these courses with one or more

additional approved technical electives that account for the engineering points assigned to that course. Please speak to an academic advisor prior to doing so.

Basic requirements	General math & science courses	37
	Core courses in major	51
Elective requirements	BIOE technical electives	9
	Open electives and LPAP	13
	FWIS and distribution courses	21
Minimum credit required for the B.S.		131

Of the 131 total degree credits, the B.S. in Bioengineering requires 97 credits in general math and science courses and core and elective engineering courses.

## Major Requirements

NUMBER	CREDIT	TITLE
MATH 101/105	3	Single Variable Calculus I /AP or other credit in Calculus I
MATH 102/106	3	Single Variable Calculus II /AP or other credit in Calculus II
MATH 211	3	Ordinary Differential Equations and Linear Algebra
MATH 212	3	Multivariable Calculus
PHYS 101•/111/125	4*	Mechanics w/Lab
PHYS 102**/112/126	4*	Electricity and Magnetism w/Lab
CHEM 121	4*	General Chemistry I w/Lab
CHEM 122	4*	General Chemistry II w/Lab
CHEM 211§	3	Organic Chemistry
CAAM 210	3*	Introduction to Engineering Computation (pre-req to BIOE 252)
MECH 202	3	Mechanics/Statics (pre-req to BIOE 370 and 372)
ELEC 243	4*	Introduction to Electronics (pre-req to BIOE 383)
BIOC 201	3	Introductory Biology
BIOC 341	3	Cell Biology
BIOE 252	4	Bioengineering Fundamentals
BIOE 320	1	Systems Physiology Lab Module
BIOE 322	3	Fundamentals of Systems Physiology

BIOE 440	1	Statistics for Bioengineers
BIOE 44X	2	Advanced Bioengineering Labs (2 of 7, see GA)
BIOE 451	4	BIOE Design I (Must take 451 and 452 the same year)
BIOE 452	3	BIOE Design II (Must take 451 and 452 the same year)
TECH elective**	3	Technical Elective
TECH elective**	3	Technical Elective
TECH elective**	3	Technical Elective

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

\*\* Must have 6 engineering points within 3 TECH elective courses

• When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.

•• When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

§ When registering for CHEM 211, you must also register for CHEM 213, the discussion section for 211.

‡Students may choose to replace one and only one of these courses with one or more additional approved technical electives that account for the engineering points assigned to that course. Please speak to an academic advisor prior to doing so.

# CHBE

## Chemical and Biomolecular Engineering

<b>WEB LINKS</b>	<a href="https://chbe.rice.edu/undergraduate-program">https://chbe.rice.edu/undergraduate-program</a>
<b>FRANK ADVICE</b>	Start talking to your advisor as early as possible and explore the many options available to you!
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Consider taking more advanced MATH (211/212), organic chemistry or the introductory CHBE courses during your freshman year. Contact Ken Cox (krcox@rice.edu) for advice.
<b>ALTERNATIVE CURRICULA</b>	Students following the B.S. program can use their electives to create a specialization or focus area in one of five disciplines: biotechnology/bioengineering, environmental engineering, computational engineering, energy and sustainability engineering, or materials science and engineering. The more flexible B.A. program allows students to pursue a double major.
<b>BS VERSUS BA</b>	Our department offers two undergraduate degrees: the Bachelor of Science in Chemical Engineering (B.S.Ch.E.) and Bachelor of Arts (B.A.) degree. Only the program leading to the B.S.Ch.E. degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, <a href="http://www.abet.org">http://www.abet.org</a> . The B.S.Ch.E. degree is the more appropriate path for students wanting to pursue a professional career in the field of chemical and biomolecular engineering. The B.A. program is more flexible and allows a student to pursue other areas of interest or prepare for professional careers in medicine, law or business.

<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	Biochemistry, numerical analysis, cell biology, courses on environmental studies (ENST), other courses listed in the specialization areas.
<b>RESEARCH AND INTERNSHIPS</b>	Most ChBE majors participate in undergraduate research, either through the courses (CHBE 495 or CHBE 499) or through summer research internships. For further information on research opportunities talk to ChBE undergraduate advisors or contact directly the faculty whose research interests you. Most students also pursue industrial or national lab internships.
<b>STUDY ABROAD</b>	Study abroad semesters are possible and encouraged. Keep in mind that core ChBE courses are offered only once a year, and some courses are somewhat hard to match. With advanced planning however, several international locations work for ChBE students, who commonly go abroad in their sophomore or junior spring terms.
<b>PROFESSIONAL ORGANIZATION</b>	The American Institute of Chemical Engineers (AIChE) has a very active student chapter at Rice that provides real-world experience with internships at sponsor companies, talks on technical, career, and professional topics, scholarships, etc. See <a href="http://aiche.rice.edu">http://aiche.rice.edu</a> for details on membership, meetings and more.

# CEE

## Civil and Environmental Engineering

<b>WEB LINKS</b>	<a href="https://ceve.rice.edu/undergraduate-program">https://ceve.rice.edu/undergraduate-program</a>
<b>FRANK ADVICE</b>	Make a 4-year plan early on to know what the major entails and update as you go. Consult with advisors if in doubt. Don't overload your schedule in the first two semesters; try to get the prerequisites out of the way and aim to take 15-18 credits per semester. Take CEVE 101 in the freshman year to get a broad overview of courses and research in the department. Take CEVE 481 in the fall term and CEVE 480 in the spring of your senior year. Try studying in groups, after your own reviews, to enhance learning and critical discussion skills. Join and actively participate in student and professional organizations.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	With at least a 4 on AP exams, you may not need to take courses such as Physics, Chemistry, Calculus or Biology. If you feel you are ready, you can take higher level courses or honors courses. You can also get started with your master's degree in the last one to two years.
<b>GRADUATION REQUIREMENTS</b>	Students are responsible for making certain that their plan of study meets all degree and major requirements. These requirements are found in the General Announcements. Students have the option of following either their matriculation or graduation year requirements.
<b>BS VERSUS BA</b>	The B.S. program is accredited by the Engineering Accreditation Commission (EAC) of ABET, <a href="http://www.abet.org">www.abet.org</a> . The B.S. is recommended for those interested in graduate studies or careers as licensed professional engineers. The B.A. degree is recommended to students interested in graduate studies outside of engineering such as policy, law or medicine, or those interested in pursuing a double major or a minor, such as the one in energy and water sustainability.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	CEVE 325 Structural Analysis & Modeling, (required for structures and mechanics specialty), CEVE 322 Engineering Economics, CEVE 313 Uncertainty and Risk in Urban Infrastructures, CAD/CAE course (CEE tutorial), and Fondren Library's Introduction to GIS.

<b>RESEARCH</b>	Students are encouraged to seek undergraduate research experience with CEE faculty members. Explore research opportunities early by talking to professors and expressing interest in their work. CEVE 101 will introduce you to CEE faculty and their research areas.
<b>INTERNSHIPS</b>	Students are encouraged to apply for summer internships. The ASCE student chapter and the Center for Career Development's job fairs are great resources. Internships are not limited to engineering firms, but have more leverage if related to your career focus.
<b>STUDY ABROAD</b>	While challenging, study abroad is possible for engineers. Required Rice courses may not be offered at universities abroad. Plan to travel in the spring of the sophomore year or fall of the junior year. Consider joining Engineers Without Borders and implement engineering projects in developing countries. Travel is typically during scheduled breaks.
<b>PROFESSIONAL ORGANIZATIONS AND STUDENT CLUBS</b>	ASCE (American Society of Civil Engineers) student chapter, EWB (Engineers Without Borders), Chi Epsilon Honor Society, Concrete Canoe Club, Earthquake Engineering Research Institute (EERI), and the Society of Women Engineers, among many others. Visit <a href="https://studentcenter.rice.edu/club-listings">https://studentcenter.rice.edu/club-listings</a> .
<b>EXPLORATORY COURSES FOR NON-MAJORS</b>	CEVE 101 Fundamentals of Civil and Environmental Engineering, CEVE 310 Principles of Environmental Engineering, CEVE 307 Energy and the Environment, CEVE 406 Intro Environmental Law, CEVE 313 Uncertainty and Risk in Urban Infrastructures.

# B.A. In Civil & Environmental Engineering

## (Track E: Environmental Core Curriculum)

**Specializations:** Courses labeled as SPEC cover topics in which environmental engineering and other disciplines share a common interest. Take 7 courses from electives approved by an advisor assigned by the CEE Dept., including 4 from one specific focus area. Of these 7 electives, 4 must be 300 level courses or above, and 2 of these upper-division courses must be from the CEE curriculum. Examples of areas of specialization include environmental science and engineering, civil engineering, biology, chemical engineering, chemistry, economics or management.

*\*\*\*For Areas III and IV Focus, CEVE 471/472 is a requirement and CEVE 401 is an Area I elective.*

*\*\*\*\*FAC-8 CEVE courses (2 in each focus area I-IV) required for breadth*

*\*\*\*\*FAS-2 additional CEVE courses in one focus area (I-IV) required for specialization*

BASIC REQUIREMENTS	General math & science courses	40-41
	Core courses	24
	Focus area courses	24
	Focus specialization courses	6
ELECTIVE REQUIREMENTS	Open electives, FWIS and LPAP	21
	Distribution courses	18*
Minimum credit required for the B.S.		133-134

Of the 133-134 credits, the B.S. in Civil Engineering requires 94 credits in general math and science, core, and specialization area courses.

\*Our B.A. required Math & Science includes (3) Distribution III courses, so only 18 additional hours are needed.

## Major Requirements

NUMBER	CREDIT	TITLE
CAAM 210	3	Introduction to Engineering Comp
CAAM 335 or MATH 354 or MATH 355	3	Matrix Analysis/Honors Linear Algebra/Linear Algebra (or approved equivalent)
CHEM 121	4*	General Chemistry I w/Lab
CHEM 122	4*	General Chemistry II w/Lab
ESCI 115 or any ESCI course or BIOC 201	3	Earth Structure & Deformation/Earth System Evolution & Cycles/Global Biochemical Cycles & Ecology
MATH 101/105	3	Single Variable Calculus I /AP or other credit in Calculus I
MATH 102/106	3	Single Variable Calculus II /AP or other credit in Calculus II
MATH 211	3	Ordinary Differential Equations
MATH 212	3	Multivariable Calculus
PHYS 101/103	4*	Mechanics w/Lab
PHYS 102/104	4*	Electricity and Magnetism w/ Lab
STAT 310	3	Probability and Statistics or equivalent
CEVE 101	3	Fundamentals of Civil and Environmental Engineering
CEVE 211	3	Engineering Mechanics
CEVE 310	3	Principles of Environmental Engineering
CEVE 311	3	Mechanics of Solids and Structures
CEVE 312	1	Strength of Materials Lab
CEVE 363	3	Applied Fluid Mechanics
CEVE 401** or CEVE 471/472***	4	Environmental Chemistry and Lab Principles of Soil Mechanics
CEVE 480	3	Senior Design
CEVE 481	1	Introduction to Senior Design
FAC	24	8 courses (2 courses in each of the four focus areas)
FAS	6	2 additional courses from one focus area preferred for specialization

\* The Engineering BS is broken down into 4 focus areas.

<sup>1</sup> Environmental Engineering - CEVE 302, 307, 308, 404, 406, 411, 434, 442, 444 or other approved course.

<sup>2</sup> Hydrology and Water Resources - CEVE 314, 412, 418, 420, 512, 518 or other approved course.

<sup>3</sup> Structural Engineering and Mechanics - CEVE 325, 400, 427, 431, 432, 441, 476, 496 or other approved course.

<sup>4</sup> Urban Infrastructure, Reliability and Management - CEVE 301, 313, 320, 424, 452, 460, 492 or other approved course.

\*\*For Area I & II Focus, CEVE 401 is required and 471/472 is an Area IV Elective.

\*\*\*For Areas III and IV Focus, CEVE 471/472 is a requirement and CEVE 401 is an Area I elective.

\*\*\*\*FAC-8 CEVE courses (2 in each focus area I-IV) required for breadth

\*\*\*\*\*FAS-2 additional CEVE courses in one focus area (I-IV) required for specialization

# CAAM

## Computational and Applied Mathematics

<b>WEB LINKS</b>	<a href="https://www.caam.rice.edu/undergraduate-program">https://www.caam.rice.edu/undergraduate-program</a>
<b>FRANK ADVICE</b>	CAAM 210 (Introduction to Engineering Computation) develops important MATLAB skills; most future CAAM classes require more mathematical analysis and less programming. Students with a strong math background and programming experience can potentially take CAAM 210 in the fall of their freshman year.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	CAAM majors with a 5 on the BC Calculus exam should strongly consider the Honors Calculus sequence (MATH 221/222) in place of the MATH 212 (Multivariable Calculus) requirement. Because the content from MATH 212 is spread over both semesters of 221/222 (in greater depth and breadth), students must complete both 221 and 222 in place of 212: but most students find the extra effort to be well worth it.
<b>ALTERNATIVE CURRICULA</b>	Double majors can coordinate some of the CAAM “specialization electives” with classes from their other majors. Students completing a senior design project in another engineering major can usually coordinate that with the CAAM senior design requirement. Please consult a CAAM major advisor to work out a program of study as soon as possible.
<b>BS VERSUS BA</b>	CAAM only offers a B.A. degree.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	Students who intend to pursue graduate study in applied math should take MATH 321 (Introduction to Analysis I) and MATH 322 (Introduction to Analysis II); these students would also benefit from MATH 425 (Integration Theory).

<b>RESEARCH</b>	Many CAAM majors engage in undergraduate research, either with a CAAM professor or beyond (e.g., in the Texas Medical Center). Students often find a research opening by first making a positive impression on professors through active and constructive participation in class.
<b>INTERNSHIPS</b>	Summer research internships are often available, too. Many students also pursue industrial or lab internships; notices are posted to the CAAM undergrad email list.
<b>STUDY ABROAD</b>	Study abroad semesters are possible and encouraged.
<b>PROFESSIONAL ORGANIZATION</b>	The student chapter of the Society for Industrial and Applied Mathematics (SIAM) offers occasional talks on technical, career, and professional development topics. For membership and meeting details, see <a href="http://www.caam.rice.edu/~siamchapter/">http://www.caam.rice.edu/~siamchapter/</a> for details on membership and meetings.
<b>INTERESTING COURSES FOR NON-MAJORS</b>	CAAM 210: Intro to Engineering Computation (mathematical modeling and MATLAB programming) CAAM 334 or 335: Matrix Analysis (matrices, linear systems, least squares, eigenvalues) CAAM 336: Differential Equations in Science and Engineering (Fourier series and finite elements) CAAM 378: Intro to Operations Research and Optimization (good for math econ (MTEC) majors) CAAM 519: Computational Science I (scientific programming with advanced math libraries)

# B.A. In Computational and Applied Mathematics

**Specializations:** CAAM Majors must complete four quantitative elective courses at the 300 level or above. Two must be at the 400 level or above. Two must be CAAM courses; the others must be drawn from a list of approved elective courses maintained by the Undergraduate Committee. That list, and other information on approved and disallowed elective courses can be found in the Undergraduate Handbook available on the department's web site.

† Students with prior experience with calculus may replace this class with a 3-credit quantitative elective at the 200-level or above, as approved by a CAAM undergraduate advisor. (This quantitative elective is in addition to the four required specialization electives.)

# COMP

## Computer Science

<b>WEB LINKS</b>	<a href="https://cs.rice.edu/undergraduate-program">https://cs.rice.edu/undergraduate-program</a>
<b>FRANK ADVICE</b>	The sample schedule is the best guide, especially for the first few semesters where it's important to take the core courses. But, generally, take the following as early as possible: COMP 140 or 160, 182, 215, and ELEC 220.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Computer science AP credit does not count toward the major requirements. If you have AP credit for Math, you should take the upper level math requirements earlier.
<b>ALTERNATIVE CURRICULA</b>	There is a lot of flexibility with the timing of the MATH/CAAM/STAT requirements and the upper-level COMP courses.
<b>BS VERSUS BA</b>	The B.S. provides more depth than the B.A. The only difference in courses in the first two years is the physics requirements for a B.S. Students should speak with a major advisor about the choice of degrees as the best choice depends largely on circumstances and objectives.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	Some popular computer science courses include COMP 330, 410, 430, 440.

<b>RESEARCH</b>	Many computer science undergraduates pursue research. The best way to find out about research opportunities is to talk with faculty who work in areas that you are interested in.
<b>INTERNSHIPS</b>	Internships are plentiful in computer science, some of which are posted on the department web site and emailed to majors. Most students have little trouble finding internships if they are interested.
<b>STUDY ABROAD</b>	With advance planning, it's not difficult to study abroad, even if not taking major-related courses while abroad. Most of the project-oriented courses are hard to get transfer credit for, while the mathematical requirements and theoretical courses are fairly easy to get transfer credit for.
<b>PROFESSIONAL ORGANIZATIONS</b>	Rice University Computer Science Club ( <a href="http://csclub.rice.edu/">http://csclub.rice.edu/</a> ) CSters (Rice University's Society for Women in Computer Science) ( <a href="http://csters.rice.edu/">http://csters.rice.edu/</a> ) ACM Programming Contest – contact John Greiner ( <a href="mailto:greiner@rice.edu">greiner@rice.edu</a> ) for info.
<b>INTERESTING COURSES FOR NON-MAJORS</b>	COMP 140, 160,182, 435, 448

# ELEC

## Electrical and Computer Engineering

<b>WEB LINKS</b>	<a href="https://ece.rice.edu/">https://ece.rice.edu/</a>
<b>FRANK ADVICE</b>	Start with MATH, CHEM, PHYS, and COMP requirements to get a solid background. Some of the sophomore core ELEC courses may be taken freshman year, such as ELEC 220, but often ELEC 241, 242, and 261 are best taken in the sophomore year. See the ECE department undergraduate web page and the IEEE student branch handbook at <a href="http://ieee.rice.edu/">http://ieee.rice.edu/</a> for additional sample degree plans.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	ELEC 220, ELEC 241, ELEC 242, and ELEC 261 are introductory core courses. Many students take ELEC 261 or ELEC 220 in freshman year, but depending on one's math background, ELEC 241 and ELEC 242 may be better taken in the sophomore year.
<b>ALTERNATIVE CURRICULA</b>	ECE has four specialization areas: computer engineering (CE); data science/systems (DS/SYS); neuroengineering (NEURO); and photonics, electronics and nanodevices (PEN). CE focuses on hardware design within computer systems, covering computer architecture, security and storage. DS/SYS seeks to extract meaningful, actionable information from diverse data sources. Applications include wireless communications, digital signal processing, computer vision and networking. NEURO seeks to understand and manipulate neural networks, as well as treat diseases and disorders. PEN seeks to more fully understand the interaction of light and matter and apply that knowledge to develop novel devices and technologies.
<b>BS VERSUS BA</b>	ECE offers the traditional B.S. degree for students interested in engineering careers. The program leading to the B.S. is accredited by the Engineering Accreditation Commission (EAC) of ABET, <a href="http://www.abet.org">www.abet.org</a> . The program leading to the BA degree is not accredited by the EAC and is often pursued by students as a component of a double major or dual degree program.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	ELEC 262 Introduction to Waves and Photonics ELEC 447 Introduction to Computer Vision ELEC 475 Learning from Sensor Data

<b>RESEARCH</b>	There are many opportunities for undergraduate independent and team research in ECE, including ELEC 490: Undergraduate Research Projects. Several faculty have started the Large Scale Integrated Projects program (VIP) open to all levels. Summer research opportunities are available through Research Experiences for Undergraduates (REU). Contact faculty directly for more information. ECE has a Corporate Affiliates program ( <a href="http://eacad.rice.edu">eacad.rice.edu</a> ), and encourages students to attend the annual event held in spring to meet informally with member companies.
<b>INTERNSHIPS AND STUDY ABROAD</b>	There are many opportunities in electrical and computer engineering for study abroad and international internships. See <a href="http://engineering.rice.edu/abroad">http://engineering.rice.edu/abroad</a> .
<b>PROFESSIONAL ORGANIZATIONS</b>	The Institute for Electrical and Electronics Engineers (IEEE) has an active student chapter and an Eta Kappa Nu honor society at Rice. See <a href="http://ieee.rice.edu">ieee.rice.edu</a> for details on the Friday lunch talk schedule. The IEEE student chapter chair for 2019-2020 is Tiger Yang ( <a href="mailto:tiger.yang@rice.edu">tiger.yang@rice.edu</a> ). Also, the ECE Department has an active colloquium series, with many events co-sponsored by IEEE Houston chapters chaired by ECE faculty.
<b>INTERESTING COURSES FOR NON-MAJORS</b>	ELEC 220 Fundamentals of Computer Engineering ELEC 243 Electronic Measurement Systems ELEC 261 Electronic Materials and Quantum Devices

# MSNE

Materials Science and  
NanoEngineering

<b>WEB LINKS</b>	<a href="https://msne.rice.edu">https://msne.rice.edu</a>
<b>FRANK ADVICE</b>	Many MSNE students pursue graduate degrees in top graduate schools after earning their B.S. degree, so undergraduate research experiences are quite important. Research intern experiences also help students obtain industrial jobs after graduation.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Students with AP credit for calculus would do well to move the MATH and CAAM sequence up. If the CAAM sequence can be fully completed in the sophomore year, this reduces the junior year pressure and also allows for more opportunities to participate in undergraduate research.
<b>ALTERNATIVE CURRICULA</b>	Not applicable.
<b>BS VERSUS BA</b>	Students are encouraged to pursue the B.S. degree instead of the B.A. degree, especially those who plan to pursue a graduate degree or practice engineering.

<b>RESEARCH</b>	Many MSNE majors participate in undergraduate research; some even start during their freshman year. To get involved, speak to a MSNE undergraduate advisor or directly to a MSNE faculty member.
<b>INTERNSHIPS</b>	Summer research internships are often available through individual MSNE research labs, as well as universities abroad. Many students also pursue industrial or government lab internships as well. Notices are posted to the MSNE undergrad email list.
<b>STUDY ABROAD AND INTERNSHIPS</b>	Study abroad and full-time off-campus internships need to be scheduled in the spring semester of the sophomore and junior years. This avoids conflicts with lab classes and the year-long senior design sequence.
<b>PROFESSIONAL ORGANIZATIONS</b>	American Ceramic Society (ACerS) ceramics.org Association for Iron & Steel Technology (AIST) aist.org ASM International asminternational.org The Minerals, Metals, and Materials Society (TMS) tms.org Rice Undergraduate Materials Science and NanoEngineering Society materialsociety.blogs.rice.edu Rice Center for Engineering Leadership(RCEL) rcel.rice.edu

# MECH

## Mechanical Engineering

<b>WEB LINKS</b>	<a href="https://mech.rice.edu/undergraduate-program">https://mech.rice.edu/undergraduate-program</a>
<b>FRANK ADVICE</b>	Students interested in pursuing a degree in Mechanical Engineering are encouraged to declare their major early. See an advisor to create your degree plan.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Students with AP credit for calculus are encouraged to take the MATH and CAAM sequences earlier than suggested in the sample degree plan.
<b>ALTERNATIVE CURRICULA</b>	Double majoring is not encouraged due to the large number of required classes in the B.S.M.E. degree. Students intending to double major should consult an advisor to develop an appropriate program of study.
<b>BS VERSUS BA</b>	Only the B.S. degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, <a href="http://www.abet.org">www.abet.org</a> , and is the most direct route toward becoming a licensed professional engineer (PE). The B.A. is recommended for students who will pursue professional careers in medicine, law, or business immediately after their undergraduate education.

<b>RESEARCH</b>	Students are encouraged to speak with their professors directly regarding undergraduate research opportunities. To learn more about faculty research go to <a href="https://mech.rice.edu/research">https://mech.rice.edu/research</a> .
<b>INTERNSHIPS</b>	Most students participate in summer internships in industry, especially after sophomore and junior years. Students should register with the Center for Career Development ( <a href="http://ccd.rice.edu/">ccd.rice.edu/</a> ) and explore further opportunities on the CCD's RICElink, where potential employers post open positions and internships.
<b>STUDY ABROAD</b>	Study abroad is most feasible in the fall semesters of the sophomore and junior years. This can avoid conflicts with lab classes (MECH 331, 332) and avoids conflicts with the year-long senior design sequence (MECH 407/408).
<b>PROFESSIONAL ORGANIZATIONS</b>	The American Society of Mechanical Engineers ( <a href="http://asme.rice.edu/">asme.rice.edu/</a> ) hosts industry representatives and organizes outreach, service and design projects. The American Institute of Aeronautics and Astronautics ( <a href="http://aiaa.rice.edu/">http://aiaa.rice.edu/</a> ) organizes activities for students interested in aerospace engineering. Many mechanical engineering students are also active in the Rice Engineers Without Borders chapter ( <a href="http://ewb.rice.edu/">ewb.rice.edu/</a> ). Leadership positions are often available to freshmen and sophomores in all of these organizations.
<b>INTERESTING COURSES FOR NON-MAJORS</b>	MECH 454 Computational Fluid Mechanics MECH 498 Introduction to Robotics MECH 594 Introduction to Aeronautics

SPEC	MECH elective #1	3		OPEN	Open elective	3	

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

- When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.
- When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

BASIC REQUIREMENTS	General math & science courses	36
	Core courses in major	42
ELECTIVE REQUIREMENTS	MECH specialization electives	9
	Open electives and LPAP	19
	FWIS and distribution courses	21
Minimum credit required for the B.S.		127

Of the 132 total degree credits, the B.S. in Mechanical Engineering requires at least 87 credits in general math and science courses and core courses.

## Major Requirements

NUMBER	CREDIT	TITLE
CAAM 210 or MECH 210	3	Introduction to Engineering Computation
CAAM 335	3	Matrix Analysis
CAAM 336	3	Differential Equations in Science and Engineering
CHEM 121	4*	General Chemistry I w/Lab
MATH 101/105	3	Single Variable Calculus I /AP or other credit in Calculus I
MATH 102/106	3	Single Variable Calculus II /AP or other credit in Calculus II
MATH 211	3	Ordinary Differential Equations and Linear Algebra
MATH 212	3	Multivariable Calculus
PHYS 101•	4*	Mechanics w/Lab
PHYS 102••	4*	Electricity and Magnetism w/Lab
STAT/MECH/CAAM/DSCI 300+	3	Limited Elective
MECH 200	1	Sophomore Lab
MECH 202	3	Mechanics/Statics
MECH 203	3	Classical Thermodynamics
MECH 231	3	Mechanical Engineering Design Tools
MECH 310	3	Rigid Body Dynamics
MECH 315	3	Stress Analysis
MECH 350	3	Mechanical Elements
MECH 331	1	Junior Laboratory I (Mechanics Lab)
MECH 332	1	Junior Laboratory II (Thermo/Fluids Lab)
MECH 340	1	Industrial Processing Lab
MECH 343	4*	Modeling of Dynamic Systems
MECH 371	3	Fluid Mechanics I
MECH 407	4	Mechanical Design Project I
MECH 408	3	Mechanical Design Project II
MECH 420	3	Fundamentals of Control Systems
MECH 481	3	Heat Transfer
SPECIALIZATION ELECTIVE	3	Mech Area of Specialization #1
SPECIALIZATION ELECTIVE	3	Mech Area of Specialization #2
SPECIALIZATION ELECTIVE	3	Mech Area of Specialization #3

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

- When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.
- When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

# STAT

## Statistics

<b>WEB LINKS</b>	<a href="http://statistics.rice.edu/undergraduate-program/BA-statistics">http://statistics.rice.edu/undergraduate-program/BA-statistics</a>
<b>FRANK ADVICE</b>	STAT 310 is our core theory course in probability and statistics and is a prerequisite for almost all advanced courses. Learn it as best you can. Students without AP credit should consider STAT 280 or STAT 305 prior to STAT 310. An alternative to STAT 310 is STAT 315. Statistics majors are strongly encouraged to take STAT 310 over 315. Many courses use the statistical computing package, R, which you learn in STAT 405. Linear algebra background is useful for STAT 410, a course on regression. Majors should take STAT 310 (or 315), 405 and 410 as soon as possible. Science and/or pre-med students should consider STAT 305, but be aware that STAT 305 does not satisfy prerequisite requirements as do STAT 310/315 for most advanced STAT courses.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	AP credits are respected at the level of STAT 280 (introductory statistics course). Engineering students with AP credits should consider taking STAT 310 or 315. Be sure and satisfy the MATH prerequisites before STAT 310/315.
<b>ALTERNATIVE CURRICULA</b>	Statistics is a very useful and marketable double-major. Double majors can coordinate some of the STAT “specialization electives” (e.g., finance or biostatistics) with classes from their other majors. Talk with an advisor about electives if interested in double-majoring.
<b>BS VERSUS BA</b>	STAT only offers a B.A. degree.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	Students interested in data analytics or data science should consider STAT 405, 410, 413, and 435, as well as the Data Science Minor. Students with biostatistics, bioinformatics or systems biology interests should consider STAT 423 and 453 (contact Profs. Kimmel, Guerra, or Vannucci). Students with computational finance interests should consider STAT 421, 482 and 486 (contact Profs. Ensor or Dobelman).

<b>RESEARCH</b>	Many STAT majors participate in undergraduate research. If there is a professor whose research interests you, ask him or her if you may join his or her research group. Summer research opportunities on and off campus are also possible. Talk with an advisor for more information or visit the department's web page of undergraduate opportunities: <a href="https://statistics.rice.edu/undergraduate-program/opportunities">https://statistics.rice.edu/undergraduate-program/opportunities</a> . Deadlines for summer opportunities may be as early as Nov–Feb.
<b>INTERNSHIPS</b>	Summer internships are often available. These may or may not be paid. Talk with an advisor for more information or visit the department's undergraduate opportunities page: <a href="https://statistics.rice.edu/undergraduate-program/opportunities">https://statistics.rice.edu/undergraduate-program/opportunities</a> . Deadlines for summer opportunities may be as early as Nov–Feb.
<b>PROFESSIONAL ORGANIZATION</b>	Houston Area Chapter of American Statistical Association (HACASA) welcomes student participants at their meetings. See <a href="https://community.amstat.org/houston/home/">https://community.amstat.org/houston/home/</a> for details. The Rice Data Science Club: <a href="http://datasci.rice.edu">datasci.rice.edu</a>
<b>INTERESTING COURSES FOR NON-MAJORS</b>	General STAT 315 Statistics for Data Science STAT 385 Methods of Data Analysis and Data Science STAT 405 R for Data Science STAT 413 Machine Learning STAT 435 Data Science Projects Bio/EnvSci STAT 423 Probability in Bioinformatics and Genetics STAT 453 Biostatistics STAT 485 Environmental Statistics and Decision Making Financial Statistics STAT 482 Quantitative Financial Analytics STAT 486 Market Models STAT 421 Applied Time Series and Forecastingx

# B.A. Statistics

**Specializations:** Finance, biostatistics/bioinformatics, environment, data science.

Students interested in statistics should consider taking STAT 280, 305 or 385 as early as freshman year. These courses are less mathematical than STAT 310 and 315, but are excellent in developing foundations in statistics and data analysis skills.

## Sample Degree Plan

*THIS IS ONE EXAMPLE OF MANY POSSIBLE SCHEDULES. CONSULT A DIVISIONAL OR DEPARTMENTAL ADVISOR TO CUSTOMIZE YOUR DEGREE PLAN. THIS EXAMPLE ASSUMES A FRESHMAN WITHOUT CALCULUS I (MATH 101) AND WITHOUT AN INTRODUCTORY STATISTICS COURSE, INCLUDING AP STATISTICS. SOME FRESHMEN MATRICULATE WITH CREDIT FOR MATH 101 AND 102 AND AN INTRODUCTORY STATISTICS COURSE OR AP STATISTICS. IN THIS CASE, CONSULT A STATISTICS DEPARTMENT UNDERGRADUATE ADVISOR.*

FALL			SPRING		
<b>FRESHMAN</b> 17 credits			<b>FRESHMAN</b> 16 credits		
MATH 101	Single Variable Calculus I or 105	3	MATH 102	Single Variable Calculus II or 106	3

OPEN	Open elective	3	OPEN	Open elective	3

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

\*\* STAT 305, 310, 315 and 385 may not count as electives for the statistics major. Students may request approval for up to one statistics-related course from other departments to count toward the specialization electives.

BASIC REQUIREMENTS	General math & science courses	12
	Core courses in major	20-21
ELECTIVE REQUIREMENTS	Specialization electives	18
	Open electives and LPAP	48-49
	FWIS and distribution courses	21
Minimum credit required for the B.A.		120

Of the 120 total degree credits, the B.A. in Statistics requires 50–51 credits in general math and science, core, and specialization area courses.

## Major Requirements

NUMBER	CREDIT	TITLE

# REQUIREMENTS FOR BACHELOR'S DEGREES

Below is a checklist for some of the requirements for earning a bachelor's degree from Rice that apply to ALL majors. The Rice University General Announcements is the final authority on all academic regulations, including those pertaining to degree and major requirements. See "Information for Undergraduate Students: Graduation Requirements" in the Rice University General Announcements for more details and additional requirements. See Undergraduate Students, <https://ga.rice.edu/undergraduate-students/>, then Graduation Requirements <https://ga.rice.edu/undergraduate-students/academic-policies-procedures/graduation-requirements/>.

Major requirements are specified by the department or program; for example, the specific math and science courses, core engineering courses, and engineering electives that you must complete to be awarded a degree in a given major.

Degree requirements are specified by the university; for example, the number of semester hours that must be taken to satisfy distribution requirements or the portion of upper-level course hours that must be taken at Rice.

## General Rice Degree Requirements

In order to graduate with a bachelor's degree from Rice University, you must:

- Be registered at Rice full time for at least four full fall and/or spring semesters.
- Complete the requirements of at least one major degree program.
- Complete at least 120 semester hours (some degree programs require more than 120 hours).
- Complete at least 60 semester hours at Rice University.
- Complete at least 48 hours of all degree work in upper-level courses (at the 300 level or higher).
- Complete more than half of the upper-level courses in degree work at Rice.
- Complete more than half of the upper-level courses in your major work at Rice (certain departments may specify a higher proportion).
- Complete all Rice courses satisfying degree requirements with a cumulative grade point average of at least 1.67 or higher.
- Complete all Rice courses satisfying major requirements with a cumulative grade point average of at least 2.00 or higher.
- Satisfy the writing and communication requirement.
- Satisfy the Lifetime Physical Activity Program requirement.
- Complete courses to satisfy the distribution requirement.

# ENGINEERING COURSES

## ACCESSIBLE TO FRESHMEN

---

For course descriptions, see <http://courses.rice.edu>.

### **THERE ARE NO PREREQUISITES FOR THESE COURSES:**

---

ENGI 101	Introduction to Engineering Design (Fall)
ENGI 120	Introduction to Engineering Design (Fall/Spring)
ENGI 140	Engineering Leadership Development (Fall/Spring)
ENGI 150	Survey of Engineering Disciplines (Fall)
ENGI 242	Communication for Engineers (Fall/Spring)
BIOE 202	Careers in Bioengineering (Spring)
CEVE 101	Fundamentals of Civil and Environmental Engineering (Fall)
CEVE 307	Energy and the Environment (Fall)
CEVE 322	Engineering Economics (Spring)
COMP 140	Computational Thinking (Fall)
COMP 130	Elements of Algorithms and Computation (Fall)
COMP 160	Introduction to Computer Game Creation (Fall)
COMP 162	Introduction to Game Content Creation (Fall)
ELEC 220	Fundamentals of Computer Engineering (Spring)
MSNE 201	Introduction to NanoEngineering (Fall)
STAT 280	Elementary Applied Statistics (Fall & Spring)

### **THESE COURSES HAVE MINIMAL PREREQUISITES:**

---

CAAM 210	Introduction to Engineering Computation (Fall/Spring)
ELEC 240	Fundamentals of Electrical Engineering I Lab (Fall)
ELEC 241	Fundamentals of Electrical Engineering I (Fall)
MECH 200	Classical Thermodynamics (Spring)
MECH 202	Mechanics/Statics (Fall)
MECH/CEVE 211	Engineering Mechanics (Fall/Spring)
STAT 305	Introduction to Statistics for Biosciences (Fall)
STAT 310	Probability and Statistics (Fall/Spring)
STAT 315	Statistics for Data Science (Fall/Spring)

RICE
